

220 Freshmen Leave for Camp

FACULTY ANNOUNCES MANY PROMOTIONS AND APPOINTMENTS

Aeronautical Engineering and Business Administration Add New Heads

DEWEY IS FACULTY CHAIRMAN

Promotions and changes in the Staff of the Institute Faculty have recently been made, according to information received from the Office of the President, as follows: Professor Erwin H. Schell '12, and C. Fayette Taylor have been appointed heads of the departments of Business and Engineering Administration and Aeronautical Engineering, respectively.

New Full Professors

Promotions to the grade of full professor in their respective departments include: Arthur A. Blanchard '98, Inorganic Chemistry; Earle Buckingham, Engineering Standards and Measurements; Otto G. C. Dahl '21, Electric Power Transmission; Frederick K. Morris, Geology; Richard H. Smith '18, Aeronautical Engineering; Robert H. Smith, Machine Construction; Walter C. Voss, Building Construction; Louis J. Gillespie, Physico-Chemical Research.

Associate Professors newly appointed in their respective departments are Evers Burtner '15, Naval Architecture and Marine Engineering; William A. Crosby '17, English; Hoyt C. Hottel '24, Fuel and Gas Engineering; William H. Jones '09, Mechanical Engineering; Clifford E. Lansil '17, Electrical Measurements; Fairfield E. Raymond '21, Industrial Research; Penfield Roberts, English; Frank J. Robinson '08, Architecture; and Dr. F. H. Slack, Public Health Laboratory Methods.

To the position of assistant professor, the following appointments have been made: F. Leroy Foster '25, James W. Pratt and John P. Walstead '29, Mining; Richard H. Frazier '23, Harold L. Hazen '24 and Perry H. Moon '27, Electrical Engineering; William C. Greene, English and History; John F. G. Gunther '23, Architecture; James R. Lambirth, Me-

(Continued on page four)

Technology Dorms Have Banner Year

Bursar Ford Explains System of Fines Imposed for Lease Breaking

Despite the fact this has been said to be a year of depression the Technology Dormitories are having a banner year. After renting rooms on a weekly basis during the entire summer, the administration offices of the dormitories are leasing quarters to students for the entire fall term.

To date almost every single room in the entire dormitory group has been leased, and all but a very few of the double rooms have been taken. During the past few days those men who have been renting by the week have been continually on the run as the permanent occupants of the rooms have come to the Institute to claim their quarters.

Dorms Have Full House

In addition to having a full house so far as single rooms are concerned, the dorm office now has a waiting list of approximately forty applicants for rooms. The Bursar's office announced yesterday that several additional rooms have been engaged by a group of students from Soviet Russia who sailed from Germany Thursday and who will arrive at the Institute in time to begin regular class work next week.

It is expected that the Dormitory Committee will meet sometime during the next week when regular classes have begun, and that the usual dormitory activities will get under way in the immediate future.

Fines for Lease Breaking

At the end of the scholastic year last spring it was announced that the breaking of a dormitory room lease would make the lessee liable to a fine of fifty dollars. When interviewed late yesterday afternoon, Bursar Ford said that if a man breaks a room lease and there is an applicant for the room a fine of ten dollars is imposed on the original lessee. However, if there is no one who will take the room when the lease is broken, the original lessee is liable to a fine of the full fifty dollars.

FRESHMAN CAMP PROGRAM

FRIDAY

2:30 p.m. Assembly at Walker Memorial to leave for camp.
5:00 p.m. Swim.
6:00 p.m. Supper.
Introductions, John Lawrence '32, T.C.A. freshman Camp Director.
History of Camp Massapoag, John Walters, Camp Director.
7:30 p.m. Assembly in Friendship Lodge, Walter Humphreys '97, Corporation Secretary, History and Traditions of the Institute (Illustrated).
Donald B. Gilman '32, President of the Senior Class and Chairman of the Institute Committee.
J. Colham Noyes '32, Walker Memorial Committee.
Col. Frank J. Locke, Personnel Bureau.
Orville B. Denison '11, Technology Songs and Cheers.
Councilors' meeting in Friendship Lodge.
9:00 p.m. Taps.

SATURDAY

7:00 a.m. Reveille, setting-up exercises and dip.
7:30 a.m. Breakfast and announcements.
Camp details.
8:15 a.m. Discussion, with W. J. Kitchen leading.
9:00 a.m. Presentation of activities, Donald B. Gilman '32, presiding.
Freshman Registration Suggestions, Assistant Dean P. T. Pitre.
10:45 a.m. Group activity meetings in tents.
11:00 a.m. Swim.
12:15 p.m. Dinner and announcements.
Assembly in Council Ring; President Karl T. Compton, Dean Harold E. Lobdell '17 and Col. Samuel C. Vestal.
1:15 p.m. Athletic program.
3:00 p.m. Swim.
6:15 p.m. Supper, announcements.
7:30 p.m. Assembly in Council Ring; Bursar Horace S. Ford, Dr. James L. Tryon, Professor Leicester F. Hamilton and others.
8:30 p.m. Movies in Friendship Lodge, Orville B. Denison '11, presiding, and sleight-of-hand demonstrations by Messrs. Tripp '33 and Allan '34.
9:15 p.m. Councilors' meeting in Friendship Lodge.
10:00 p.m. Taps.

SUNDAY

7:30 a.m. Reveille, setting-up exercises and dip.
8:00 a.m. Breakfast and announcements.
8:15 a.m. Camp details.
11:00 a.m. Track meet, Coach Hedlund in charge.
Discussions, with W. J. Kitchen in charge.
12:00 p.m. Dinner and announcements.
2:30 p.m. Baseball game.
3:30 p.m. Swim.
6:15 p.m. Supper.
7:30 p.m. Assembly in Council Ring.
8:30 p.m. Movies in Friendship Lodge, Track Coach Hedlund in charge.
10:00 p.m. Taps.

MONDAY

6:45 a.m. Reveille.
7:15 a.m. Breakfast.
8:15 a.m. Departure for Cambridge.

MASSACHUSETTS INSTITUTE OF TECHNOLOGY OFFICE OF THE PRESIDENT

To the Editor of THE TECH:

Dear Sir: May I ask your cooperation in transmitting this personal message of greeting to the old and new students of the Institute as they are about to meet for the first exercises and activities this fall. The older students have already made contacts and have made good in their work. The incoming students have these things ahead of them, but will find the older students, the Faculty, the Technology Christian Association, and all Technology organizations eager to assist them in taking their places in the life and work of the Institute.

The coming year is peculiar in that it emphasizes the opportunities open to those who are so fortunate as to be able to carry on their training, and with these opportunities goes the inevitable tendency to take the responsibility seriously. Together with this serious aspect of the work of the Institute, there are so many features which contribute to enjoyment of the life here, that I can wish for every student a year in which pleasure and profit are combined.

Very sincerely yours,

Karl T. Compton

FRESHMEN LEAVE FOR T. C. A. CAMP THIS AFTERNOON

WILL RETURN ON MONDAY

Faculty Members Will Inspect Camp and Meet Frosh on Saturday

Two hundred and twenty-five fortunate freshmen and fifty upperclassmen and faculty are leaving this afternoon in busses at 2:30 o'clock from Walker Memorial for Camp Massapoag, Dunstable, Mass. This annual freshman encampment is sponsored by the Technology Christian Association and has in the past proved a large factor in making the new men feel the Technology spirit and gives an opportunity for valuable instruction and information.

Captains and managers of the Institute athletic teams and the Managing Editors of the publications will be the councilors in charge of the tents and they will be ready to answer any questions that might trouble the newcomers.

Faculty to Visit Camp

Fifteen members of the Faculty will spend Saturday afternoon and evening in Camp and President Karl T. Compton will also be on hand to welcome the freshmen with Dean Harold E. Lobdell '17 and several prominent alumni.

There are about 3000 members of the Tech branch, and a conservative estimate of the dividends indicates that about \$18,000 will be distributed on the basis of ten per cent for all cash purchases and eight per cent for charged articles.

The majority of dividends will lie

between five and seven dollars for the students of the Institute, as many of them have bought practically the same articles. Some extraordinary dividends run from thirty cents to ninety dollars, the former being the profit of a student who joined the Coop and then left school. The total amount of dividends amounts to the sum of over \$80,000.

THE TECH Will Hold Candidates Meeting

Smoker Mass Meeting for New Men Will Be Held in West Lounge

Many Meets Arranged

Schedules already prepared for track and cross country teams include enough meets to make the fall season interesting to those competing for positions. Probably the event drawing the largest interest during the season is the freshman-Sophomore Relay race. It is held as a part of the annual Field-Day activities.

This competition involves 24 men and gives everyone in the two lower classes a chance to try out for positions in this interesting race — it also has been a spectacular race and interest seems to be getting keener and keener each year. This competition in addition to giving the candidates a chance to participate in actual meets gives coaches Hedlund and Bowie an opportunity to see what the freshman class has to offer for the coming winter and spring meets.

In November candidates for positions on the varsity and freshman squads compete in the annual interclass meet held on Tech Field. Handicap meets are held at various times during the year and in all there is some competition during almost every week in the winter and spring.

Freshman Cross-Country

Freshman cross country has always drawn a large number of men and this year the attractive schedule that has been

Two Shells Go to Camp

Coach Hains of Crew is taking two eight-oared shells, to be rowed by ambitious frosh. After a day of practice the crab-catching beginners will draw straws for crews and the staff will witness the future varsity men struggle with the oars for the camp championship. Two or three varsity men will be along to coach the youngsters at the art of feathering and pulling.

Twenty-two target rifles and five thousand rounds of ammunition will be taken to camp by the Military Science Department for the campers to use to try their skill. The rifle range proved a popular place in Camp last year.

Camp Lent by Y. M. C. A.

Camp Massapoag, which is owned by the Cambridge Y. M. C. A., is loaned to the T. C. A. for the period of the freshman camp. One of the recent features of the

(Continued on page four)

Capture Walker Rodent With Broom and String

Big game hunting at the Institute started off on a small scale yesterday morning in Walker Memorial with the capture of a small grey mouse through use of an ingenious method which may go far in solving the rodent problem. The creature was dexterously cornered with the aid of a broom while another brave soul tied a string around its tail, thus forcing the animal into total submission.

It now rests on the cash register in the Walker basement, much annoyed, and refusing to take any notice of its new environment but otherwise none the worse for its capture. Two large peanuts and a piece of yellow cheese lie well within its reach, but up to this time have not received the attention expected from one of this ever-hungry species. As soon as the rodent emerges from its state of splendid isolation Ed Pung hopes to put it in training for a prominent place in the next Boston pet show.

NOTICE

Three meals will be served daily beginning next Monday in Walker Memorial. This includes Saturdays and Sundays.

Announcements

THE TECH regrets to announce the untimely death of Ronald W. Fortier '33 who served as Circulation Manager with Volume LI, also the resignation of Paul E. Davis '33 as News Editor, and Fred W. Wehmiller '33 as Sports Editor.

We are pleased to announce the elections of Stanley R. Johnson '32 to the position of Circulation Manager, Dayton H. Clewell '33 to News Editor, William B. Sheppard '33 to Make-Up Editor, and John C. Hayes '33 to Advertising Manager.

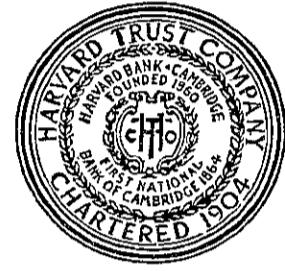

"I never did like bulldogs," quakes Eddie must be nourished exclusively on stale food. At least that's the only excuse the Lounger can think of.

Depression and more depression. That is all the Lounger has heard for these many moons and now he is almost ready to take somebody's word for it. All he ever bought a T.E.N. subscription for was to have that beautiful calendar to ornament his always too crowded desk to tell him when he could lay down his weary head and refrain from going to classes. Now there will be no more calendars (Yes, freshie, on account of the depression) and T.E.N. loses its staunchest supporter. Ho hum.

The Lounger caught Phosphorus, the skulking Voo Doo cat, stalking Eddie Pung's mouse the other day. The Lounger waved his long grey beard in Phos' face and well nigh scared his old enemy out of his shoes. Just when Phos could have been working on his first issue too instead of misbehaving in a very unladylike manner. Ho hum, the Lounger never could understand Phos or his jokes either, especially those "gawdawful" puns.

Harvard Trust Company

... YE WHO ENTER HERE

WELCOME, Class of 1935! It is not without unusual enthusiasm that Volume LI of THE TECH extends heartiest greetings to the incoming men. While we as a publication of the undergraduate body are primarily interested in the school as a unit, we would take this opportunity of congratulating the uninitiated upon their choice of a school of higher education, and of assuring these men the Institute is theirs for the asking.

Freshman classes have been entering Technology for ninety years, each numbering among its members the weak and the strong, the industrious and the lazy, the leader and the follower. Without a shade of doubt the Class of 1935 is composed of the same general ingredients. We are not attempting to draw an allegory nor to point to a moral. Men entering this year are certainly old enough to appreciate their individual responsibilities, and, if the entrance examinations are to be considered a proper measuring stick, quite capable of attaining the qualifications that are expected of every Technology undergraduate.

Not that four years at the Institute is to mean no more to you than a record of satisfactory grades and a diploma. Decidedly not! Those of the entering class who have been fortunate enough to be registered at the Freshman Camp will find that Technology offers in its undergraduate activities and sports countless opportunities for broadening one's acquaintances and strengthening one's position as a valuable member of the student body.

You have heard the cry before: "Get into activities!" We echo it but do not qualify our plea further. We merely advise the freshman to interest himself in some order or movement which departs from the regular curricular work. The benefits accruing from such associations are multiple. We have cited two — there are countless more.

In the following issues of THE TECH we will publish brief reviews of the principal undergraduate activities and athletics to be found at Technology. We urge that every man in the Class of 1935 force himself, if such action is needed, to develop into something more than a human Physics or Chemistry textbook.

Stay out of the rut, Freshmen! Wake up to the opportunities that lie before you! The Institute is yours for four years, provided you have the common sense to pull on the right end of the oar. Give your school work all the time it merits, but use your "off hours" to your advantage in some worthwhile undergraduate activity.

TRAINING EXECUTIVES

THE newspapers and the July *Technology Review* devoted no small amount of space to announcing the foundation of six fellowships in Business and Engineering Administration at the Institute. Through these fellowships, established by six graduates of Technology who now hold responsible positions in the business and industrial worlds, it is proposed to select a group of young men who as undergraduates have proven intellectual ability along with the qualifications for leadership, and to offer these men the advantages of a thorough education in Business Administration.

The Institute and the industrial world at large should recognize in the establishment of these fellowships a new departure in the field of higher education, and should realize that as an experiment to test Technology's value to business and industry it has no peer. There seems no need to point out the constant demand for new and capable men to fill responsible positions, a demand which has only slightly decreased in the present depression. Certainly the fact that through these fellowships there will be built up a new group of aspiring executives seems to indicate that opportunities await every ambitious young man, and that business leaders are always eager to discover and to assist such a young man.

The establishment of these fellowships is more than a compliment to the Department of Business and Engineering Administration and its head, Prof. Erwin H. Schell '12. The high regard in which this division of the Institute's curriculum is held by recognized industrial leaders is indicative of the soundness of Course XV. May we take this opportunity to congratulate the six appointees, and to thank the sponsors for their sincere devotion to the ambitious Technology graduate.

"Ho Hum and other expressions of dismay," says the Lounger on returning to his dear old A.M. (that means Alma Mater, freshies, and not the morning after the night before) to resume his feeble struggles against the inevitable force (F equals Ma as Pop Drisko will soon spend many, many weary hours trying to convince you, freshie) of Institute professors and instructors after a far too brief sojourn in — recuperating from the avalanche of FF's (that does not mean Fairy Fine, youngster) that well nigh snowed ye poor old Lounger under last June. Now that the stress and strain (those good old T.M. lab expressions!) of condition exams are over the Lounger says "Ho Hum" again and retires to Wally Ross' Restful Retreat at Lake Massapoag as befits a retiring gentleman of leisure, suh.

The Lounger has always been proud of his youthful face and figure despite the long grey beard which at times becomes slightly inconvenient (especially when riding his horse out to Wellesley, greenies) but to be taken for a member of the Class of 1935 by some unsuspecting fraternity man bent on rushing the poor little freshmen to death makes him hang his head in shame and pray the gods to send him a few venerable wrinkles for the brow. Not that the Lounger hasn't been rushed before but he just simply hates to take advantage of these over zealous greek-letter-eating-lodge men to work himself in on a few free meals and shows.

The Lounger wonders what the Institute will do for a freshman class next year when the tuition is \$600 a year. Or aren't you going to raise your prices a \$100 a year, Horace?

The Lounger also wonders if there will be more freshmen than Sophomores in the Field Day glove fight with the smallest entering class in ten years making freshie as scarce as hair on Billiard-Ball Bailey's head.

Shades of Rube Goldberg and Houdini! The Lounger has witnessed many queer contraptions in his long sojourn at the Institute but the prize palm was awarded the other day for the dingus in the Rev. Voss' office. A mysterious combination of wire Ford carburetors, batteries, and what-not (mostly whatnot) results in the automatic recording of the absorption of this by that. Tradition says it was invented this summer by one of Pappy Tucker's protégés in Course XVII but you can't fool the Lounger. Take off the whiskers, Rev.

Hark, ye freshies, to the words of wisdom about to pour forth from ye Lounger. Tradition says that the overlord of the Sophomore class, commonly known as the president, shall have a dip in dear old Lake Massapoag nightly at the precise stroke of midnight and woe be to you if you fail to carry out such a worthy tradition. The Lounger has always had a soft spot in his heart for the dear little freshmen but if you should fail him in this, he shall be obliged to turn loose the tongue of wrath, so to speak, and then freshies, beware. Just suppose your dear Sophomore brother has been waiting all this time to take a bath and you should disappoint him. Take heed, fresh, and act wisely and accordingly!

The Lounger wonders again if Horace is not going to give him his usual split on the \$5 fine racket this year because of the depression. How about it, Horace? Do we or do we not take our yearly trip to our Old Howard box?

Eddie Pung, the genial game warden of Walker Basement, must be braking out his pre-Prohibition stock (not what you think, freshies, just candy) judging from the comments the Lounger has overheard on the freshness of the goods purchased at the Emporium. Perhaps Eddie's pet mouse, the new cash register guardian,

DRAWING MATERIALS

GEM UNION Drawing Instruments

Dietzgen Drawing Instruments are made of cold rolled nickel silver and highest grade tool steel. Parts for each grade of instrument are completely interchangeable and replaceable. Any instrument or part may be obtained from our nearest branch or from leading dealers in principal cities. This outstanding service of standardized manufacture has made Dietzgen Drawing Instruments the preference of professional draftsmen and the choice of leading universities and technical schools.

GEM UNION Instruments are furnished in long-wearing, four-flap, soft leather cases, affording better protection for the instruments. The cases are compact and light. Compare these pocket book cases with other types and note the difference in carrying facilities.

GEM UNION Instruments offer exclusively the additional 6-inch lengthening bar which permits a compass adjustment to 16" radius—eliminating the necessity of purchasing a beam compass later. The Dietzgen name on the case is your assurance of lasting satisfaction.

Freshman Camp Features Rowing

New Men Will Have Chance to Row in Racing Shells At Massapoag

Incoming freshmen will be given an opportunity to observe the intimate workings of an eight-oared crew this week-end at Freshman Camp, Lake Massapoag.

Two lap streak barges will be taken to the camp for demonstration purposes and will be used by the freshmen in making acquaintance with the actual rowing of this type of craft. Each of these boats has places for eight men and a coxswain.

All Freshmen Eligible

This year there will be half a dozen Varsity men present to acquaint the new men with the shells. Coach Bill Haines will be in charge of instruction. All freshmen are eligible to try out for the two camp crews, as this feature is primarily to create diversion and to interest the new men in crew, which is one of the Institute's major sports.

These crews have proven to be one of the most interesting features of the Freshman Camp, being a regular feature of the freshmen's yearly outing.

Hedlund Issues Call For Track and Cross Country Candidates

Track Coach Announces First Drill for Monday; Five Meets Scheduled

(Continued from page one)

prepared should offer an additional inducement to men to compete for positions on the team. Races will be held with Harvard, New Hampshire and Holy cross, and the team will compete in the New England Cross-Country Championship and the Intercollegiates at New York.

Every year a great number of men report for this sport and it has been the experience of the coaches that the greater portion of the candidates are novices. Before the season is over, however, the coaches note a great improvement in these men and the training they have received proves of value to them.

All men interested in this sport should report to the coaches at the Track House on next Wednesday, September 30, when the regular fall practice will be begun. Coach Hedlund stated yesterday that he would like to have out for practice every man interested whether he has had any experience or not.

Substitute for P.T.

As all freshmen probably know, first year men are required to take physical training work in the gymnasium twice a week for the last ten weeks of the first term and the first ten weeks of the second term or to take regular work-outs in one of the regular Institute sports. Track furnishes an excellent substitute for the P.T. work says Coach Hedlund; it does not require a large amount of time, it can be practiced at any time, it affords individual work to those taking part, and it serves to build up one physically.

Coach Hedlund requests that all freshmen contemplating taking part in track activities during the fall report to the track house Monday or Tuesday afternoon to ask any questions and to begin work. He wants all men to start work early this fall so that they will be in good condition when the season begins.

Technology's freshman swimming team will swim over two-thirds of its meets in pools other than that in which it practices.

Try-Outs To Be Held For Freshman Crew Managers

All freshmen desiring to compete for positions as freshman managers of crew have been requested by W. Clinton Backus '33, varsity manager, to report to the Boat House on Charles River Road next Wednesday at 5 o'clock.

As in all Institute activities positions as managers of crew are decided by competitions which are open to all men desiring to compete. First-year men who are interested in this work should report to Backus at the time stated.

First Issue of T. E. N. Will Appear Monday

Registration Day Chosen For Release of October Issue of Journal

Tech Engineering News, the undergraduate technical journal of the Institute will make its initial appearance of the year Monday, registration day, when the annual subscription campaign will be conducted throughout the Technology Buildings and grounds and the October issue distributed.

As the feature article in this month's copy Doctor Karl T. Compton, president of the Institute, has written an article entitled "Taking Stock in 1931" which is in the nature of a welcome to the incoming freshman class. Other articles in the issue, include one by Dr. M. J. Buerger, assistant professor of mineralogy and petrography, a student article on the new George Washington Bridge across the Hudson at 168th Street, New York and one on Turbine Electric Ship Propulsion by a member of the General Electric Company staff.

Subscription Campaign

Plans have been completed for the regular subscription campaign which will be held in the Institute buildings, with activity centering in the main lobby where a booth will be erected. At this time students will be urged to subscribe to the publication which appears monthly during the school year and which is the only student publication using articles of a technical nature. Both student writers and men from the faculty and industry are contributors to the magazine.

Meet Uncle Horace by Forgetting and Paying

Uncle Horace is right on the job again this year, and if the freshmen aren't acquainted with him yet, they surely will be if they forget to do the following things that are listed on the back of several pieces of registration material. But that applies to both freshmen and upperclassmen alike; so don't forget!

1. Secure approved registration card and address card from your registration officer before three-thirty o'clock Monday.
2. Secure Booklet containing class and roll cards before four o'clock Monday by showing approved registration card and deliver address and directory cards.

If you don't want to do this, just forget some of it and make the acquaintance of our dear Uncle to the tune of Five Dollars.

MASS MEETING WILL BE HELD FOR SOCCER

All men interested in soccer are asked to attend the mass meeting to be held Monday, Sept. 28, in the Hangar Gym at four o'clock. Coach Malcolm Goldie and Manager Walter R. Duncan '33 will be on hand to outline the fall and spring schedules and to interest applicants.

Both Varsity and freshmen are urged to attend, especially men who have had previous experience in playing the game. A good schedule is being worked out, including a match with Yale on October 10.

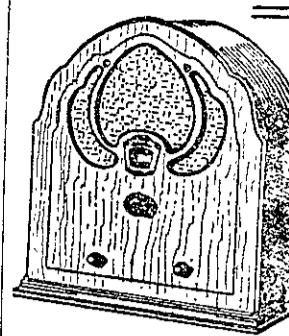

MANAGER ANNOUNCES SWIMMING PRACTICE

Of interest to members of last year's swimming squad and those freshmen who are aquatically-minded is the announcement made by Edward L. Wemple '33, manager of the swimming team, to the effect that swimming practice will begin November 2 at the University Club and will be held regularly every Monday, Wednesday and Friday thereafter.

Ten swimming meets have been scheduled for the freshmen and eleven for the varsity. About half of the varsity meets will be at other schools and the freshmen will swim the majority of their meets away from Boston.

First Year Candidates For Crew Meet Monday

All freshmen interested in crew are asked to attend a mass meeting to be held in room 10-250, Tuesday at five o'clock. This meeting is the first get-together of the new crew men at the Institute. Motion pictures of last year's season will be shown, including several pictures of the races between the Institute and the Navy. All new men are strongly urged to be present.

IMPORTANT ANNOUNCEMENT

To Freshmen:

The TECH-COOP is the official distributor of all your supplies. The material required for all freshmen has been passed upon by the Faculty and approved by them.

Every TECH Man should become a member without delay. The membership fee is one dollar.

Last year the dividends paid on purchases was 10 per cent on cash and 8 per cent on charge.

Every purchase of 25 cents or over is credited toward your dividend.

All memberships start July 1 and expire June 30.

Join before making a purchase, for dividends cannot be credited on purchases made previous to taking out a membership.

Checks not exceeding fifty dollars are cashed for members between the hours of 9 a.m. and 12 noon except Saturdays.

Charge Accounts for members only.

The Coop prices are never higher than elsewhere, and in many cases much lower. In addition a dividend is credited on all purchases of 25 cents or more.

HARVARD COOPERATIVE SOCIETY

CALENDAR

Friday, September 25

2:30 — Freshmen leave from Walker Memorial for Freshman Camp.

Monday, September 28

9:00-4:00 — Registration.

3:00 — Dr. Compton Speaks to Freshmen in Room 10-250.

4:00 — Soccer mass meeting in Hangar gymnasium.

Tuesday, September 29

5:00 — Freshman Crew mass meeting in Room 10-250.

Wednesday, September 30

5:00 — Freshmen desiring to be crew managers meet at the boat house, Charles River.

FRESHMEN LEAVE FOR CAMP THIS AFTERNOON**Over Two Hundred and Seventy Will Enjoy Three Day Get-Together**

(Continued from page one)

camp is the lighting system which was installed last year as a result of a \$400 gift of the Advisory Board of the T.C.A. to the Cambridge Y. M. C. A. This gift makes possible the use of a lantern and motion picture machine for slides and movies.

John W. Chamberlain '28 will be the camp doctor for this year, and he will have a fully-equipped infirmary in which to work. Mr. Chamberlain upon his graduation from the Institute entered the Harvard Medical School and is now in his fourth year. Incidentally, during his last year at Technology, he was President of the T.C.A., and is thus familiar with the work of freshman camp.

Slides to Portray Institute Life

Walter Humphreys '97, Secretary of the Corporation, will give a talk on the history and traditions of the Institute. His lecture will be illustrated by slides of Technology and the various activities.

Saturday night, talks will be given by many of the Faculty and alumni. President Compton, Dean Loddell, Dr. James L. Tryon and Professor Leicester F. Hamilton will also speak at the camp fire.

Program Filled to Capacity

Besides swimming, boating, football, baseball, crew racing and lacrosse, there will be a track meet and the freshmen are invited to get out and show their stuff before Track Coach Hedlund. The days will start at seven and will be filled with activities from the start to the finish.

Coach Hedlund will also hold forth at the assembly on Sunday night with track pictures and a comedy.

The Leaders at the Camp will be: T.C.A., Willis S. Hutchinson '32; M.I.T. A.A., Thomas B. Rhines '32; THE TECH, Charles M. Thayer '32; T.E.N., Clarence M. Chase '32; Musical Clubs, Eugene F. Lynch '32; Voo Doo, James E. Harper '32; Tech Show, William D. Conder '32; Technique, Theodore R. Heim '32; Freshmen Rules Committee, Wilbur B. Horton '33; Junior class, Robert G. McKay '33; Sophomore class, Henry Humphries '34; Crew, Mgr. Walter C. Backus '33; Cap't. Frederick B. Walsh '32, Varsity, Curtis D. Cummings '32, William A. Kirkpatrick '32, Cyrus S. Hapgood '32; James M. Dunlap '33; Walker Memorial Committee, J. Cobham Noyes '32; Arch. Council, Frederick M. Moss '32; Mgr. Track, Richard L. Fossett '33; Capt. Track, John W. Jewett '32; Interfrat. Conf., William H. Barker '32; Mgr. T.C.A., Cabin, Calvin H. Mohr '33; Capt. Fencing, Ralph W. Hamilton '32; Capt. Rifle, John C. Lyon '32; Dorm Committee, Leo P. Leino '32; Capt. Boxing, Peyton G. Cooper '33; Mgr. Swimming, Edward L. Wemple '34.

T. C. A. Blotters will be Available on Monday

T.C.A. blotters are to be distributed among the various fraternities and dormitories tomorrow. On Monday the blotters will be available to all students in the T.C.A. office. This year one side of the blotter is printed upside down so that when it is turned over an unworn edge is at the bottom.

Tea dances have become very popular at the University of Michigan. The male students at the University are separated into two groups—those who tea-dance and those who don't. Several skirmishes have taken place between the two factions.

The members of the men's social clubs at Columbia have spent one full year and a half out of the last eight playing bridge. Score books were consulted, and this was the deduction reached.

I.F.C. Denounces All Rushing at '35 Camp

If the fifth annual freshman camp is to be what it is intended for: that is, a breeding place of Technology spirit, the upper-classmen present must forget rushing and give the T.C.A. their full support. Any rushing done by them is clearly dishonorable conduct and will have to be treated as such. It is the hope of the Interfraternity Conference that nothing of this sort will occur.

Changes of Faculty Made During Summer**Promotions and Appointments on Instructing Staff Are Announced**

(Continued from page one)

chanical Engineering; Johnson O'Connor, Industrial Research, Business and Engineering Administration; Albert A. Schaefer, Business Law; and Samuel D. Zeldin, Mathematics.

New men on the Institute Faculty include Colonel Samuel C. Vestal, Professor, head of the department of Military Science and Tactics; Professor Louis J. Bircher, Chemistry; and Associate Professor Ralph D. Bennett, Electrical Engineering.

Professor Robert C. Eddy has transferred to the department of Business and Engineering Administration. Louis B. Slichter enters the Geology department as an associate professor, while Victor Guillemin, Philip M. Morse, and Wayne B. Nottingham join the department of Physics.

Prescott Ends Term as Chairman

Frederick S. Woods, head of the department of Mathematics, succeeds Samuel C. Prescott '94, who has completed his term of two years as Chairman of the Faculty. The seniority of the members is as follows: Professor Davis R. Dewey, head of the department of Economics and Statistics, senior member; William Hovgaard; Frank Vogel; Allyne L. Merrill '85; Edward F. Miller '86; Frederick S. Woods; Harry M. Goodwin '90; Dugald C. Jackson; John O. Sumner; and Frederick H. Bailey.

Ezra Perkins of the Class of 1934, Mississippi University, has petitioned for a change of name. "Too many instructors think I am making fun of them when I write my present name on roll cards," he says.

Believe it or not, there are very few co-ed colleges in the European Continent. Women who desire a higher education find the fulfilling of this wish extremely difficult. Many of them prefer to come to the United States.

Two professors at Purdue have compiled statistics showing that the large high schools produce the superior university students.

A small mid-western college is taking oats and wheat in payment for tuition this fall.

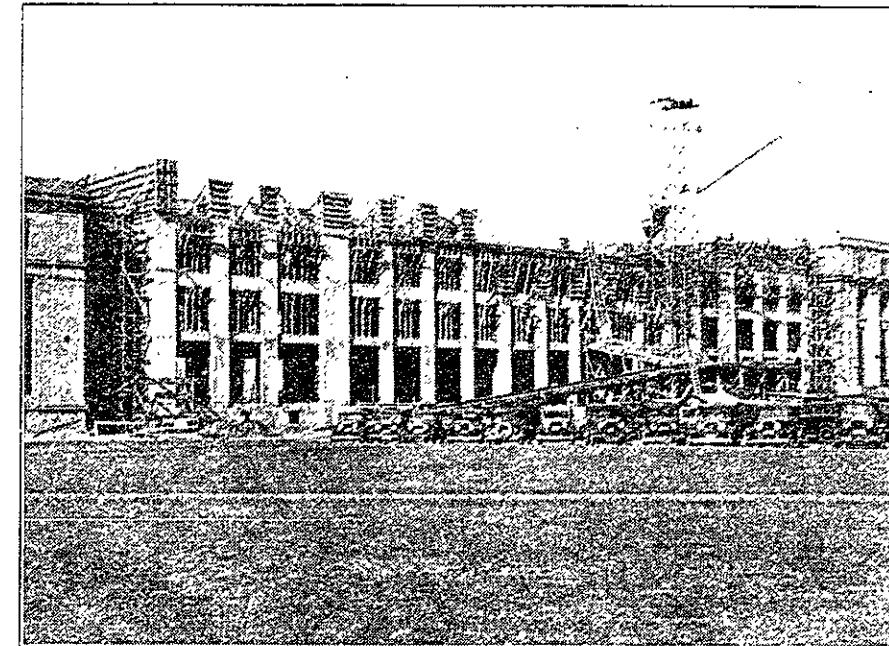

The brick used in the construction of a new building at the Washington State College were made on the grounds.

Instruction in bridge is regularly given at the College of the City of New York.

View Showing the New Physics and Chemistry Laboratory which is Now Under Construction**Continue Construction Work During Summer****New Buildings Near Completion; Hope To Use Building 6 In February**

Much additional work occasioned by the construction of the new buildings, as well as the usual summer round of repair and construction, have kept the construction forces at the Institute busy this summer.

Work on the new spectrographic laboratory has progressed to such a point that Professor George R. Harrison has begun to move his apparatus into it from the old rooms in the basement of Building 2, and it is expected that the labs will be ready for use early in the fall term.

Work on Building 6 Is Not So Rapid

Progress on the new physics and chemistry building has not been as rapid, as it was not started until sometime after the spectroscopic laboratory. Some of the concrete still remains to be cast, and the installation of the maze of water, drain, vacuum and pressure lines, as well as a number of gas lines and innumerable electric wires will take some time. It is hoped that the building will be ready for use by the start of the second term.

One of the X-Ray labs in building 4 was dismantled and in the space were installed transformers and a complete air-conditioning equipment for the spectroscopic lab. A new Laboratory of Gaseous Conduction, with complete equipment for the manufacture of radio vacuum tubes, has been installed in the room in the basement formerly occupied by the signal corps of the Military Science Department, which has been moved upstairs.

A prospective freshman student at the University of Michigan was recently expelled when it was discovered that he had forged his entrance credentials.

As a result of several campus fires, Cambridge police have asked Harvard students to act like gentlemen and to cease throwing cigarette butts from dormitory windows.

Oberlin has two college bands—one made up of the women students, the other men.

Saint Mary's has banned boxing and wrestling as minor sports. Authorities declared that these two sports were abolished because of the injuries that Moran boxers received in 1930-31, and also because the meets were held in the evenings, thereby interfering with the studies of the boxers.

At the University of Denver six students were suspended when they attended class in swimming suits.

New and Newly Renovated APARTMENTS

Near Harvard Bridge, Boston side. Five minutes' walk to Technology buildings. Two and three rooms, bath and kitchenette.

Unfurnished or Will Furnish
Also small rooms furnished
Telephone E. E. RICE, Liberty 2667, or see WILLIAM JACKSON, Information Office, Room 10-100, Technology.

BOARD AND ROOMS

All home cooking. Large, well lighted rooms. Double rooms, from \$10 apiece, with Breakfast and Dinner. Also two rooms with private bath. Convenient bathrooms—continuous hot water.
